Robot Boxes

CALCULATOR Program Sheet

A. Get the Robot Boxes Record Sheet and one index card.

B. Here is your program. Read it to yourself.

   1. If (**measure** is Area), then

      i. Multiply **length** times **width**.

      ii. Write the result on the index card.

      iii. Place card in **answer** box.

   2. If (**measure** is Perimeter), then

      i. Add **length** + **length** + **width** + **width**.

      ii. Write the result on the index card.

      iii. Place card in **answer** box.

C. Wait for Filler to place cards in the boxes.

D. Start your program.

   Use the recording sheet to help you calculate the Area or Perimeter.
